# Service Manual RABIO PANASONIC

# TIME ANNOUNCING FM/AM CLOCK RADIO MODEL RC-6900B

- \* This service manual includes only the changes of the RC-6900 or C service manual. (ORDER NO. RD-799)
- \* This manual should be filed with the service manual for model RC-6900 or C. (ORDER NO. RD-799)
- \* When servicing model RC-6900B, this service manual and the RC-6900 or C service manual should be used together.

# **CHANGES**

# ■ ALIGNMENT INSTRUCTIONS (For Germany)

Ī		FM-RF ALIGNMENT									
6	Connect to point <b>TP</b> <sub>1</sub> through FM Dummy antenna, Common to chassis. (Refer to fig. 4)	87.2 MHz	Tuning gang fully closed.	Output meter across voice coil.	L <sub>8</sub> (FM OSC Coil)	(*)Adjust for maximum output.					
7	"	90 MHz	90 MHz (9mm (1½''))	"	L₅ (FM DET Coil)	"

# PANASONIC®

# Service Manual

# TIME ANNOUNCING FM/AM CLOCK RADIO

# MODEL RC-6900 or C

# **SPECIFICATIONS**

Frequency Range:

FM 87.5~108 MHz AM 525~1605 kHz

Intermediate Frequency:

FM 10.7 MHz

Sensitivity:

AM 455 kHz FM 5µV for 30 dB Quieting

AM  $70\mu$ V/m for 50 mW Output

Power Output: 1.5W Maximum
Power Source: AC 120V 60 Hz
Power Consumption: 12W at 120V

Power Consumption: 1 Speaker: 4

4" PM Dynamic Speaker  $6\frac{11}{6}$ " (Wide)  $\times 6\frac{7}{8}$ " (High)  $\times 9\frac{13}{6}$ "

(Deep) 10 lb. 2 oz.

Weight: Impedance:

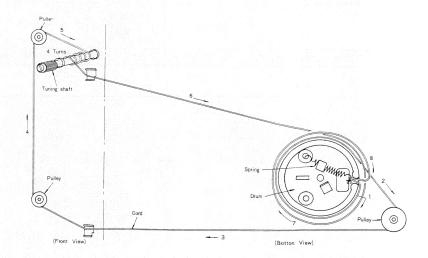

Dimensions:

# DIAL CORD INSTALLATION GUIDE

- 1. Dial cord length is  $49\frac{7}{32}$ .
- 2. Tuning gang is position at minimum capacity.
- 3. Arrows  $(1 \sim 8)$  indicate correct order and direction of installation dial cord.
- 4. Cement dial cord ends.

# TO MOUNT DIAL POINTER

- 1. Set tuning gang to maximum capacity position.
- 2. Set dial pointer to start point of dial scale.
- 3. Attach dial cord to dial pointer.

# ALIGNMENT INSTRUCTIONS

### READ CAREFULLY BEFORE ATTEMPTING ALIGNMENT Notes: 1. Set volume control to maximum or minimum (FM-IF). 2. Set band selector switch to AM or FM. 3. Set tone control to high. 4. Set clock selector switch to ON. 5. Set power source voltage to 120 volts AC. 6. Output of signal generator should be no higher than necessary to obtain an output reading. SIGNAL GENERATOR or SWEEP GENERATOR RADIO DIAL SETTING (DISTANCE) INDICATOR REMARKS **ADJUSTMENT** (VTVM or SCOPE) CONNECTIONS FREQUENCY AM ALIGNMENT Point of non-Fashion loop of 455 kHz Adjust for interference. Output meter several turns of wire (2nd IFT) 1 30% Mod. maximum output. across voice coil. (on/about (3rd IFT) and radiate signal with 400 Hz. into loop of receiver. 600 kHz) Adjust for maximum output. Adjust L4 by moving coil bobbin along ferrite core. Fig. 4 FM Dummy Antenna

# DETAILED REMEDY AND HOW TO ADJUST

# • How to remove the chassis from the cabinet

- 1 Remove knobs (8).
- 2. Remove set screws 1, 2, 6 & 7 holding the cabinet back cover, as shown in fig. 5.
- 3. Remove the cabinet back cover.
- 4. Remove plugs  $(1)\sim(5)$  from the cabinet back cover, as shown in fig. 6.
- 5. Remove the fittings from the cabinet back cover.
- 6. Remove red screws  $3\sim$  5, 8 & 9 holding the chassis, as shown in fig. 5.
- 7. Remove the chassis from the cabinet.
- 8. To install the chassis, assemble in the opposite order described above.
- Notes: 1. Be careful not to impair the clock hands, the clock face, the dial scale or the dial panel. Avoid leaving finger prints when removing or installing the chassis.
  - 2. When installing the chassis in the cabinet, insert the AC cord into the cord slot of the cabinet.

# • How to remove the deck from the chassis

- 1. Remove set screws  $1\sim4$  holding the deck, as shown in fig. 7.
- 2. Remove the multi-connector socket from the P.C.B., as shown in fig. 8.
- 3. To completely remove the deck from the chassis, straighten the three attaching legs of the shield cover with pliers and remove the shield cover. (fig. 9.)
- 4. Remove the head lead wire (gray) and the clock rotor lead wire (red and black) by unsoldering.
- 5. To install the deck in the chassis, re-assemble in the opposite manner described above.
- Notes:1. Insert the multi-connector socket into the P.C.B. so that the A and B marks of the multi-connector face the direction shown in fig. 8.
  - 2. When installing or removing the deck, care should be taken to prevent dirt from contacting the magnetic disc.

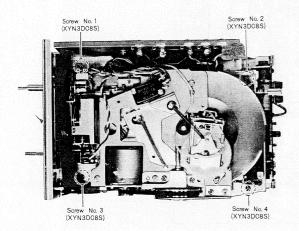

Fig. 7

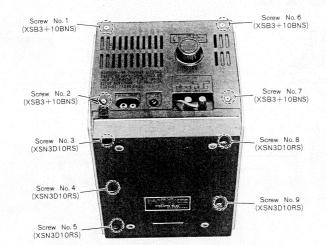

Fig. 5

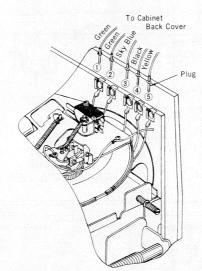

Fig. 6

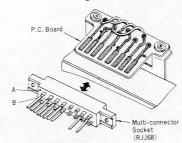

Fig. 8

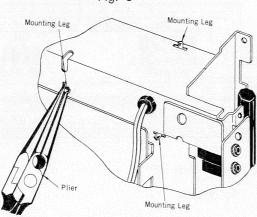

Fig. 9

# How to change the head assembly and worm wheel

- 1. Remove the head lead wires from two positions on the lead holder, as shown in fig. 10.
- 2. Remove the head spring, as shown in fig. 10.
- 3. Remove E ring 1 holding the head assembly, as shown in fig. 10.
- 4. Remove E ring 2 holding the worm wheel, as shown in fig. 10.
- 5. Remove the head assembly and worm wheel.
- 6. Remove the lead wire connected to the head at the side of the P.C. board by unsoldering.
- 7. To install the head assembly and worm wheel, re-assemble in the opposite manner described above.

Notes:1. Be careful not to lose the roller shown in fig. 10 when the head assembly and worm wheel are removed.

2. When installing the worm wheel, set the feed operation lever (colored), shown in fig. 10, in the direction of the arrow and insert the worm wheel until it is completely joined with the

# How to change the worm pulley and

- 1. Remove set screws  $1\sim3$  holding the worm pulley, as shown in fig. 10.
- 2. Remove the worm pulley and belt.
- 3. Remove the washer and the ball bearing.
- 4. To install the worm pulley and belt, re-assemble in the opposite manner described above.

Notes:1. When installing the worm pulley, insert while turning in the counterclockwise direction without impairing the worm wheel.

- 2. To install the worm pulley bracket, adjust the worm pulley bracket in the direction of the arrow so that the play in the worm pulley is from 0.3 to 0.5 mm, as shown in fig. 10A.
- 3. Apply grease or oil to the worm pulley.

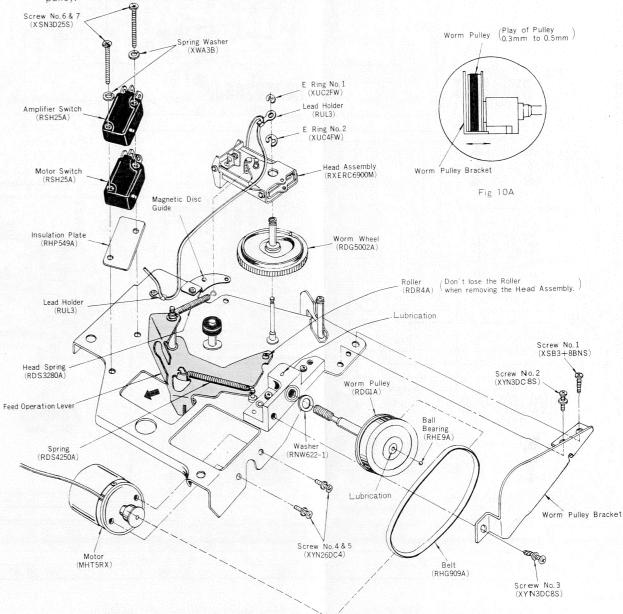

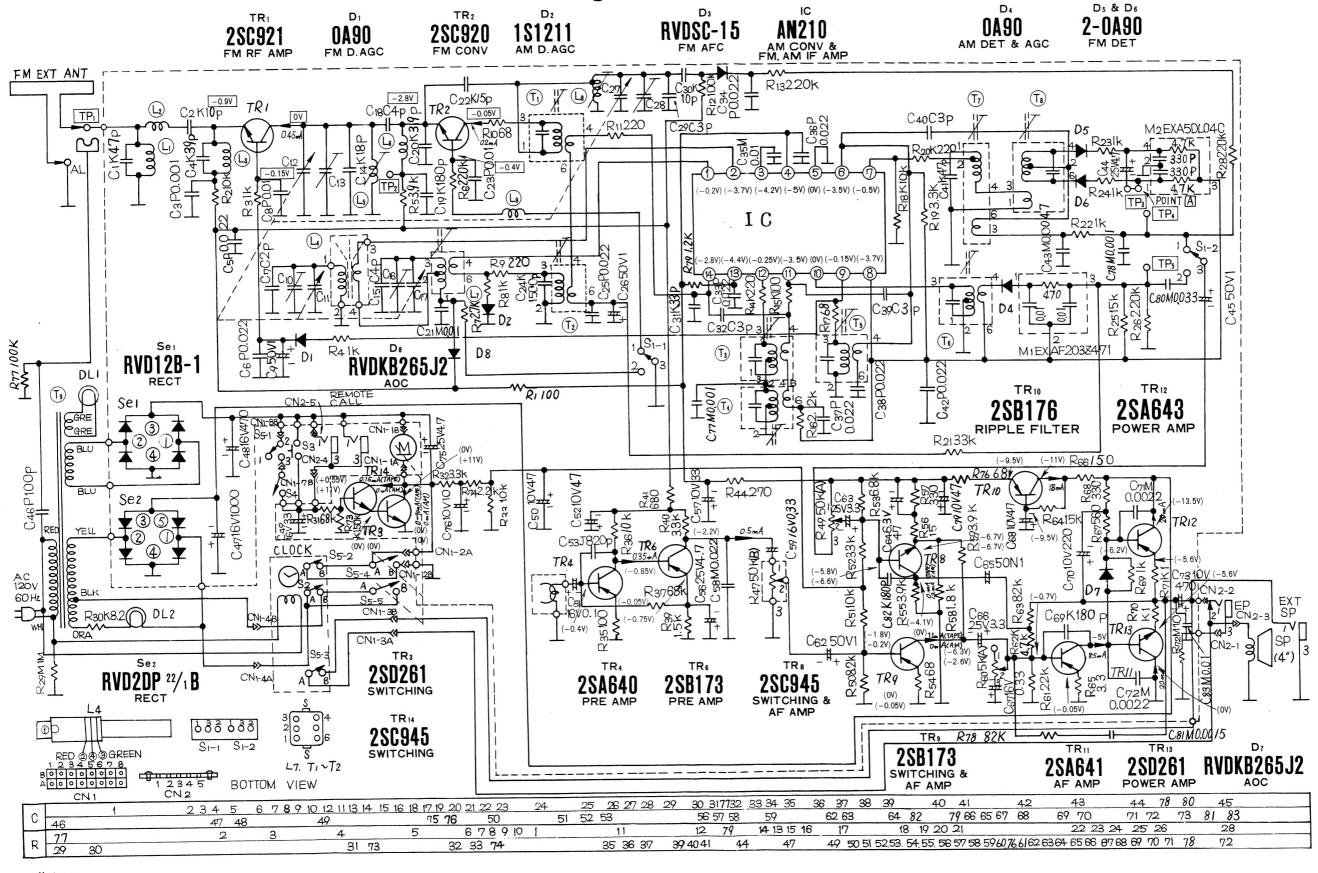

Fig. 10

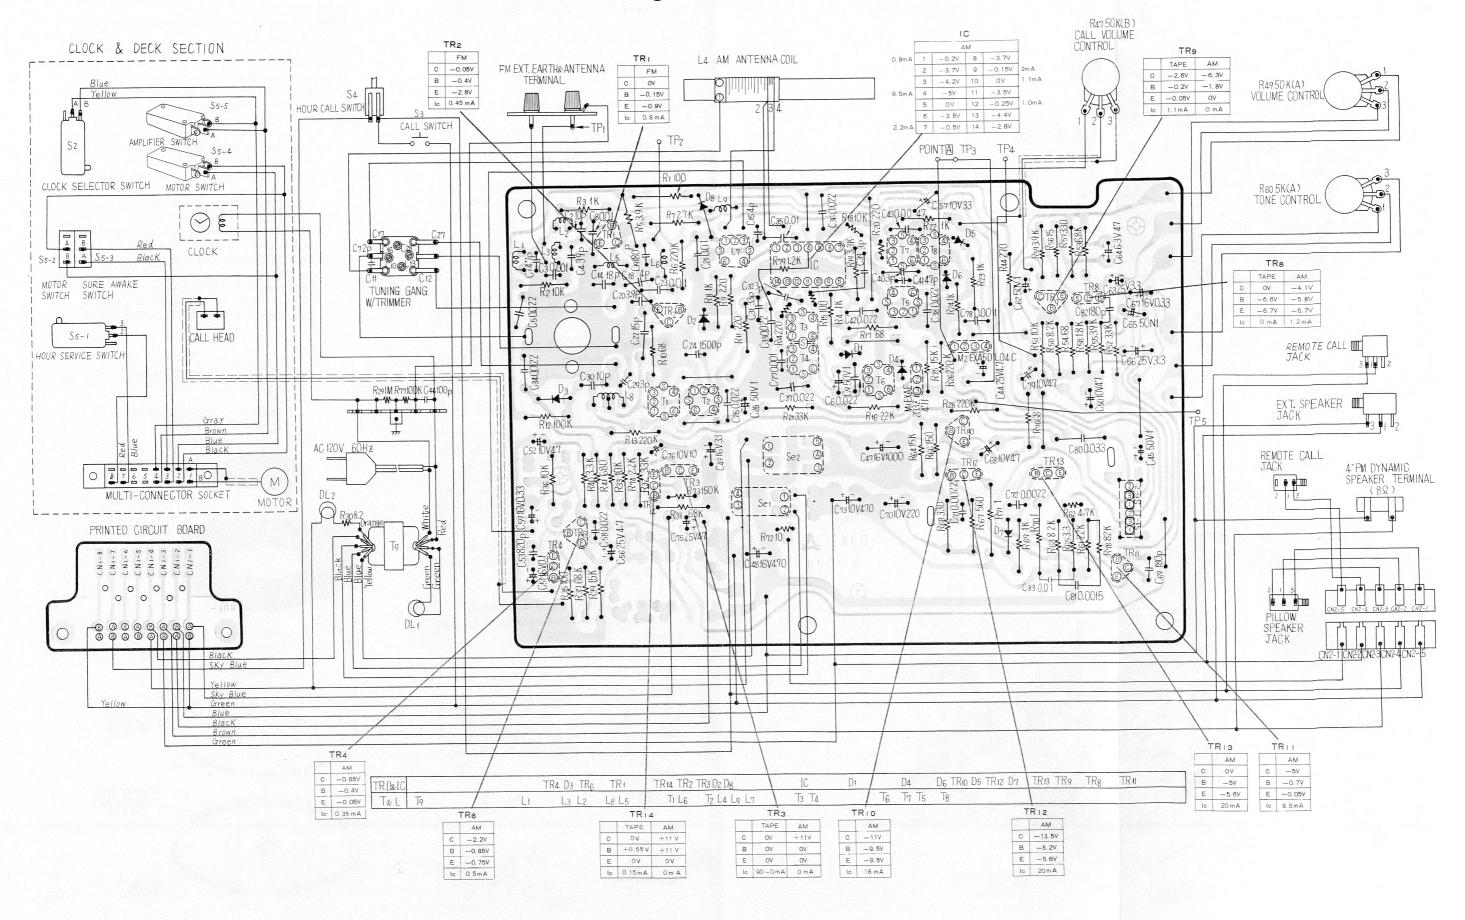

3

# Schematic Diagram - Model RC-6900 or C

- 1.  $S_{1-1} \sim S_{1-2}$ : Band selector switch in "FM" position.
- 2. S2: Clock selector switch in "OFF" position.
- 3. S<sub>3</sub>: Call switch in "OFF" position.
- 4. S4: Hour service cansel switch in "ON" position.
- 5. S<sub>5-1</sub>: Hour service switch in "OFF" position.
- 6. S<sub>5-2</sub>: Motor switch in "OFF" position.
- 7. S<sub>5-3</sub>: Sure awake switch in "OFF" position.
- 8. S<sub>5-4</sub>: Motor switch in "OFF" position.
- 9. S<sub>5-5</sub>: Amplifier switch in "OFF" position. 10. S<sub>5-6</sub>: AF signal oscillator switch in "OFF" position.

# Circuit Board Wiring View-Model RC-6900 or C

Earth

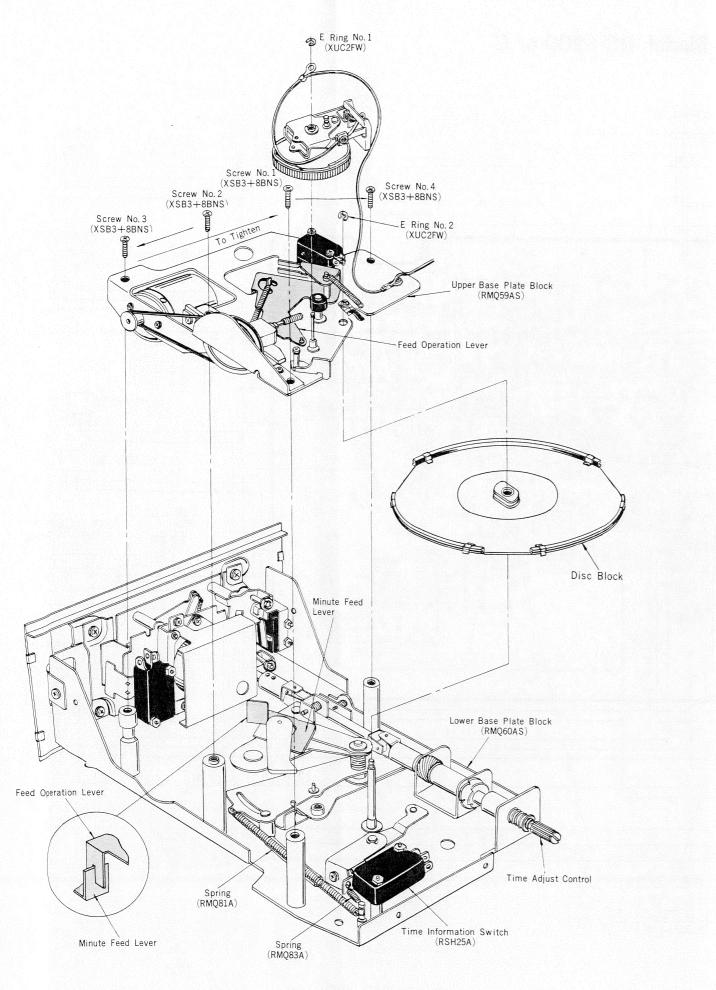

Fig. 11

### • How to change the motor

- 1. Remove screws  $1 \sim 4$  holding the upper base plate, as shown in fig. 11.
- 2. Remove E ring 2 holding the upper base plate, as shown in fig. 11.
- 3. Remove the lead wire connecting the motor by unsoldering.
- 4. Remove the belt.
- 5. Remove screws 4 and 5 holding the motor, as shown in fig. 10.
- To install the motor, re-assemble in the opposite manner described above.

**Notes:** To install the upper base plate, follow the directions below.

- (1) Fit the feed operation lever, shown in fig. 11 (upper base plate block), to the minute feed lever (lower base plate block), as shown in fig. 11A.
- (2) Install the screws holding the upper base plate in the order of 2-3-1-4, as shown in fig. 11.
- (3) Install E ring 2 holding the upper base plate, as shown in fig. 11.
- (4) Adjust the magnetic disc guide so that it is apart from the magnetic disc by  $0.5 \sim 1$  mm.

# How to change the amplifier and motor switch

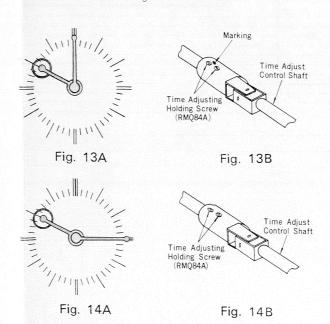

- Remove the lead wire to the amplifier and the motor switch by unsoldering.
- Remove screws 6 and 7 holding the amplifier and the motor switch, as shown in fig. 10.
- 3. Remove the amplifier and the motor switch.
- 4. To install the amplifier and the motor switch, re-assemble in the opposite manner described above.

Notes:1. Confirm that the amplifier switch and the motor switch are in the ON-OFF positions at approximately the same time. (It is better that the motor switch is in the OFF position slightly later than the amplifier switch.)

If they don't indicate ON-OFF at approximately the same time, adjust the feed operation lever until they do.

# How to change the magnetic disc

. Remove screws 1~4 holding the upper base plate block, as shown in fig. 11.

- 2. Remove E ring 2 holding the upper base plate block, as shown in fig. 11.
- 3. Remove the spring retaining the magnetic disc, as shown in fig. 12.
- 4. Remove the washer retaining the magnetic disc, as shown in fig. 12.
- 5. Remove the magnetic disc, as shown in fig. 12.
- 6. To install the magnetic disc, re-assemble in the opposite manner described above.
- Notes:1. Be sure to use the same type number for the minute magnetic disc as the hour magnetic disc. They are to be used as a pair. (The type number is printed on the back.)
  - Do not bring magnetic material near the magnetic disc.
  - Securely attach the minute magnetic disc to the magnetic disc pressure fittings.
  - 4. Securely attach the hour magnetic disc to the "H" cut in the shaft of the disc block.
  - 5. To install the upper base plate block, refer to the notes on "How to change the motor".
  - Adjust the time announcement to the time indication. (Refer to the synchronization of the time announcement and the time indication.)

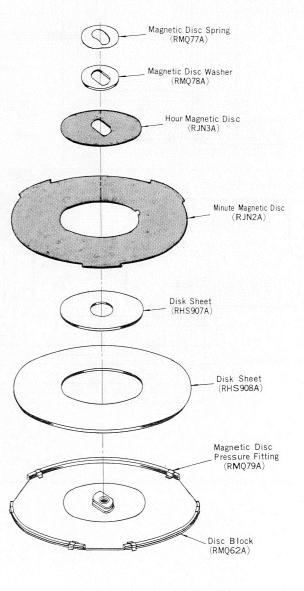

Fig. 12

7

### Synchronization alignment of the time announcement and the time indication

- 1. Turn the time adjust control and set the time exactly on the hour (zero minutes). (Refer to fig. 13A)
- 2. Mark the time adjusting shaft holding screw, as shown in fig. 13B.
- 3. Turn the time adjusting control and set the time to fifteen minutes after the hour, as shown in fig. 14A. In addition, loosen the screws (2) which were not marked, as shown in fig. 14B.
- Turn the time adjusting control and set the time to one hour later than the previous on-the-hour setting (zero minutes). Loosen the marked screws (2). (Time adjusting control shaft is disconnected from the clock shaft.)
- 5. Turn the time adjusting control and stop exactly when the time information lever pin drops back in the slot of the disc block, as shown in fig. 15.
- 6. Tighten the screws (4) which were loosened in steps 3 and 4.
- 7. Confirm that the time announcement is synchronized with the time indication. If it is not synchronized, turn the gear to the right or the left, as shown in fig. 15.

### How to remove the clock

- 1. Remove the deck from the chassis. (refer to how to remove the deck from the chassis)
- Remove the lead wires to the clock by unsoldering.
   Remove the time adjust shaft holding screws, 8 to 11, as shown in fig. 16.
- 4. Remove the clock metal fitting holding screws, 1, 2, and 7, as shown in fig. 16.
- 5. Remove the clock hands (four pieces), as shown in fig. 16.
- 6. Remove the clock holding screws, 3 to 6, as shown in fig. 16.
- When replacing the clock, assemble in the opposite order described above.
- Notes:1. When attaching the clock hands, refer to how to attach the hands to the clock.
  - 2. When attaching the time adjust shaft holding screw, refer to synchronization alignment of the time announcement and the time indication.

### How to remove the clock selector switch

- Remove the clock from the lower base plate block. (Refer to how to remove the clock)
- 2. Turn the clock selector to the "off" position.
- 3. Remove the clock selector switch, attaching nuts 1 and 2, as shown in fig. 17.
- 4. Remove the spring washer and clock selector switch, as shown in fig. 17.
- 5. When replacing the clock selector switch, assemble in the opposite order described above.
- **Note:** When changing the clock selector to on or off, confirm that the clock operation corresponds to the selector switch position.

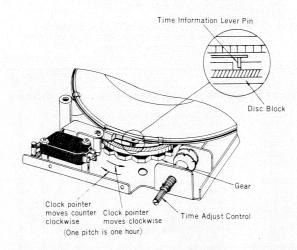

Fig. 15

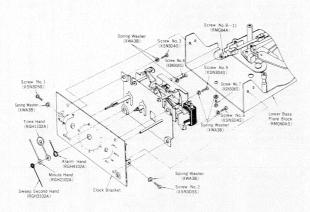

Fig. 16

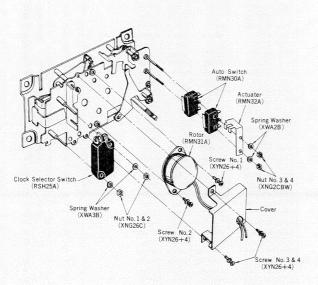

Fig. 17

# • How to remove the rotor

- Remove the clock from the lower base plate block. (refer to how to remove the clock)
- 2. Remove the rotor cover attaching screws, 3 and 4, as shown in fig. 17.
- 3. Remove the rotor attaching screws, 1 and 2, as shown in fig. 17.
- 4. Remove the rotor, as shown in fig. 17.
- When replacing the rotor, assemble in the opposite order described above.
- Notes:1. When replacing the rotor, place the rotor leads toward the bottom.
  - 2. When installing the rotor, be sure that the rotor gear and the clock gear are positively engaged.

### How to remove the auto switch

- 1. Remove the auto switch attaching nuts, 3 and 4, as shown in fig. 17.
- 2. Remove the actuater
- 3. Remove the auto switch.
- When replacing the auto switch, assemble in the opposite order described above.

**Note:** When setting the sleep time knob, be sure that the selector switch is in either the on or off position, never the call or auto position.

# How to remove the time information switch

- 1. Remove the upper base plate block attaching screws, 1 to 4, as shown in fig. 11.
- 2. Remove upper base plate block attaching E ring 2, as shown in fig. 11.
- 3. Remove the upper base plate block.
- Advance the time by turning the time adjusting knob to the position shown in fig. 18 and remove the disc plate. (The time may be advanced by turning the knob in the counterclockwise direction.)
- 5. Remove the time information switch attaching nuts, 1 and 2, as shown in fig. 19.
- Remove the time information switch, as shown in fig. 19.
- 7. When replacing the time signal switch, re-assemble in the opposite order described above.
- Notes:1. After attaching the time information switch, adjust the synchronization of the time announcement and time indication. (refer to synchronization alignment of the time announcement and the time indication)
  - After attaching the time information switch, turn the time adjust control to assure that the action of the time information switch is positively on or off.
  - When attaching the upper base plate block, refer to how to change the motor.
  - 4. When removing or installing the time information switch, care should be taken not to move the surface of, or put finger prints on the magnetic disc.

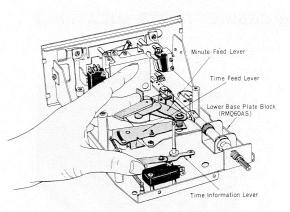

Fig. 18

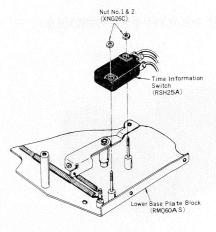

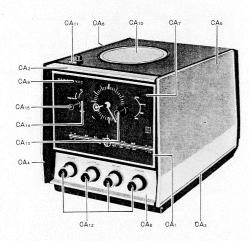

Fig. 19

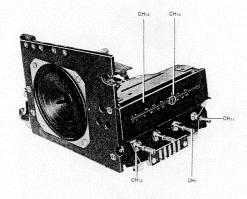

# • How to attach the hands to the clock

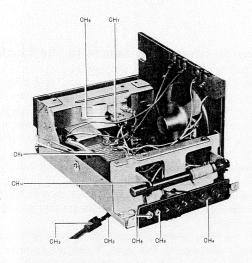

- 1. Attach the alarm hand at 7 o'clock.
- 2. Attach the hour and minute hands also at 7 o'clock.
- Turning the alarm adjusting knob, set the alarm hand to 9 o'clock. Turning the time adjust control, confirm the operation of the sleep timer when the hour and minute hands are within 5 minutes before and after 9 o'clock.
- 4. Confirm the same operation, as described in 3 above, at 12 o'clock, 3 o'clock and 6 o'clock.
- 5. If the timer doesn't operate within five minutes during the previous test, adjust the timer according to the following:
  - A. If the timer operates within 55 minutes before the hour indicated by the alarm hand, the alarm hand was attached a little before 7 o' clock, when replacing the hands, and should be re-attached.
  - B. If the timer operates after five minutes after the hour indicated by the alarm hand, the alarm hand was attached a little after 7 o'clock.
- 6. Attach the sweep second hand at zero seconds.
- **Notes:**1. It is important that each hand be attached as precisely as possible for proper operation.
  - 2. Care should be taken when handling the hands of the clock since the tips are coated with luminous paint which can be easily chipped.
